Projects

Discord All-Purpose Bot, *Personal Project*

August 2018 – Present

- Develop a multi-purpose application for Discord that utilizes libraries such as News API, Wikipedia, PRAW, and Yahoo Weather API
- Goal is to develop a program that provides a wide toolset to the user as well as gain a better understanding of integrating multiple API's in a single application.

Python Twitter-Reddit Integration, *Florida State University*

May 2018 – July 2018

- Developed a Twitter bot that pulls posts from Reddit and responds to users
- Operates using a SQL database, Tweepy, and PRAW
- Served as practice for developing my Python skills and working as a team

Skills

- *Languages*: C/C++, Java, and Python
- *Applications/Environments*: Unix, Visual Studio, MySQL, Oracle VM VirtualBox, Vim

Leadership Experience

ASLC Information Desk, *Building Manager*, Tallahassee, FL

August 2017 – Present

- Handled events hosted by FSU organizations in the building's conference rooms
- Manages over guests within the building and solves problems as they arise
